2019
The Greater New Orleans Jobs Report

PRESENTED BY
A word from Bank of America

Over the last several years, Bank of America Merrill Lynch has expanded its presence in the Greater New Orleans region and has found GNO, Inc. to be a strong partner. In 2019, we invested in the Greater New Orleans Jobs Report, a cross-sector research report of current and projected middle and high skill occupational needs for the Greater New Orleans region. In the following pages, you’ll see the findings unveiled.

GNO, Inc. tackles an important task - addressing workforce development needs to enhance resiliency by increasing regional capacity to retain and expand businesses, create jobs, and grow revenues.

Workplace evolution is all around us. From delivery drones to hologram meetings, the workplace of the not-too-distant future could look very different than it does today. The advances are accelerating to the point where there is even a new name for the phenomenon — Industry 4.0 — predicted to be every bit as seismic as the moves to steam power, assembly lines, and the Internet.

Workforce development is a priority for Bank of America Merrill Lynch and our clients. GNO, Inc.’s leadership is crucial in the regional workforce development landscape, specifically their work to align industry demand with training and education opportunities in the region.

In the pages that follow, you will discover a detailed view of skills needed for 2020 and beyond. We hope the findings help inform your company’s talent attraction and retention strategies, and lay the groundwork for the future of work in Greater New Orleans.

On behalf of our entire Bank of America Merrill Lynch team, we thank GNO, Inc. for their leadership, vision, and commitment to strengthening our local community, investing in NextGen talent, and elevating economic progress for the region.

Sincerely,

Jonathan Matessino
Senior Vice President of Global Commercial Banking
Bank of America Merrill Lynch
A word from GNO, Inc.

At GNO, Inc., our staff is working every day to create a region where our children and grandchildren can live and prosper – a region with abundant job opportunities and excellent quality of life, for everyone. We believe the ultimate indication of our success will be the presence of a robust, accessible, and growing middle class in Southeastern Louisiana. As GNO, Inc. prepares its strategic plan for the next 10 years—GNOfuture—we recognize that to achieve this vision we must have a deep understanding of the job growth and wealth-building potential in the region.

Through the Greater New Orleans Jobs Report, GNO, Inc. aims to not only illustrate high-quality careers, but also highlight opportunities for partnership between stakeholders, thus inspiring collaborations that are grounded in the best data available. Indeed, the goal of the Greater New Orleans Jobs Report is to serve as a data-driven resource for partners to coalesce around – and then take action.

GNO, Inc. recognizes the jobs and statistics contained herein are merely a snapshot in time; it is our expectation that these numbers and profiles will shift constantly. We are aware that some occupations will trend upwards with new announcements, investments, and developments. Others will evolve over time with new technologies and industry sectors altering our economic landscape.

However, through the parameters and rigor of the GNO, Inc. methodology, we are confident that the occupations highlighted within demonstrate the breadth and depth of opportunity in our region — illustrating meaningful career opportunities for the next generation of Greater New Orleans residents. It is with this in mind that I ask readers of this report to join GNO, Inc. in our response to these findings: mobilize, respond, prepare, and invest. Now is the time to ensure we have robust workforce pipelines in place linking directly to these careers.

We hope you will join us in our efforts to build the economy and workforce of Greater New Orleans. I would like to give a special thanks to Bank of America Merrill Lynch for providing the support that made it possible to publish the Greater New Orleans Jobs Report. Through partnerships like this, we are able to work toward creating a thriving region.

Sincerely,

Michael Hecht
President and CEO
Greater New Orleans, Inc.

Introduction

Building on GNO, Inc.’s standing as a go-to resource for regional industry trends, workforce data, and economic analysis, the Greater New Orleans Jobs Report provides a new level of research and data that aims to inform workforce development investments, policies, and programming, as well as talent attraction and retention initiatives, in Greater New Orleans.

The Greater New Orleans Jobs report sets out to answer a question that is central to Greater New Orleans’ economic development growth over the next 10 years: What are the high-wage, high-growth jobs in our region?

Mapping out these core occupational needs over the next decade will provide a crucial tool for regional economic development, K-12, and higher education partners to build career pathways for students to access high-wage, high-demand jobs – and to retain and attract more experienced talent (back) to the region.

What follows in this report is an in-depth analysis of 54 high-wage, high-growth occupations in Greater New Orleans.

METHODOLOGY

Below are the parameters that were developed to identify high-wage, high-growth occupations for which workforce pipelines should be built:

* At least 100 jobs as of 2018
* Median hourly salary of at least $17.98 (identified by the United Way of Southeast Louisiana as the wage needed to live comfortably in Greater New Orleans)
* Growth at a rate of at least 10 new jobs from 2008–2018

*Sustained growth expected over the next decade, based on recent business development announcements and the current regional business development pipeline, and industry partner feedback

* Jobs are related to at least one of GNO, Inc.’s six industry focus sectors:

- Advanced Manufacturing
- Biosciences
- Digital Media
- Energy and Petrochemical
- Water Management
- Transportation and Logistics

Notes: Because this report’s focus is on immediate workforce needs, occupations that required a graduate degree or higher are not included in this report.

The data in this report was extracted from the 2019.1 dataset of the labor market analytics platform Emsi.
Highlights

The jobs analyzed in this report are essential to the economic vitality of Greater New Orleans. The 77,355 jobs across 54 occupations represent 12% of all the jobs in the region. The significant number of middle-skill jobs, combined with high-wage, high growth opportunities, offers a unique opportunity to build equitable wealth in our region.

MIDDLE-SKILL JOBS

Of the 77,355 jobs analyzed in this report, 29% are middle-skill jobs – jobs that require some form of education or training beyond a high school diploma, but less than a bachelor’s degree. In addition to the more than 22,300 jobs that are middle-skill, an additional 3,021 jobs are basic-skill, while the other 67% of jobs analyzed are high-skill. The low barriers to entry amongst the basic- and middle-skill occupations coupled with the high-wages and growth offer a significant opportunity for economic mobility in Greater New Orleans.

HIGH-WAGE, HIGH-GROWTH

Since 2008, the occupations analyzed in this report have grown by 21%. This is significant because the region as a whole has only grown by 4.5%, and nationally, jobs have grown by 7.3% over the past decade.

Additionally, these key occupations offer significantly higher wages than the region as a whole. Together, these jobs have median hourly earnings of $29.90, which equates to $62,192 annually. The wages of these occupations are $14 more per hour ($29,224 more annually) than regional wages as a whole.

DEMOGRAPHICS

Demographic gaps exist that must be closed to ensure that these opportunities are offered equitably to workers across the region.

GENDER - When grouped together, female workers account for 52% of the jobs, while males account for 48%. However, upon review of individual occupations, significant gender gaps exist. Of the 54 occupations examined in this report, all but 11 occupations have a gender disparity of 60:40 or greater. In fact, 10 occupations analyzed have gender disparities of 90:10 or greater.

RACE - While the region’s workforce is made up of 42% minorities, minorities only account for 32% of the jobs analyzed in this report. The overall racial makeup of the jobs in this report is as follows:

* White – 68%
* Black or African American – 25%
* Hispanic or Latino – 3%
* Asian – 2%
* Two or More Races – 1%

In fact, of all the occupations analyzed, only Licensed Practical Nurses, Tank Car, Truck, and Ship Loaders, and Clinical Lab Techs, have a higher minority participation rate than in the region’s economy as a whole.

AGE - The impending retirement boom in these occupations is one of the most immediate needs that must be addressed to ensure these occupations are able to continue their growth trajectory. Nearly 23% of all jobs analyzed are occupied by workers 55 years or older, compared to 22% of all jobs in the region. The occupations with the highest percentage of an ageing workforce include: Administrative Services Managers, Compliance Officers, Construction Managers, Medical and Health Services Managers, and Industrial Machinery Mechanics.
GNO, Inc. Action Plan

With 12 higher education partners in Greater New Orleans, a statewide focus on high school career readiness via Jump Start pathways, and various private training providers targeting in-demand industry sectors, the region is uniquely positioned to leverage these resources to create robust, equitable workforce pipelines. However, when comparing the outputs of the region’s higher education landscape to the 77,355 jobs profiled in this report, there are clear gaps in connecting graduates to the career opportunities:

* In 2017, the region had 6,572 entry-level job postings requiring a bachelor’s degree and 3,772 job postings requiring an associate’s degree: whereas regional universities produced 5,729 bachelor’s degree completions and community colleges produced 1,098 associate’s degree completions
* Yet, approximately 54% of alumni from four-year colleges and universities in the region leave the state
* Many of the programs that feed directly to the region’s six key sectors, experience the highest rates of out-migration: medicine, chemistry, engineering, computer science

Further, the lack of data tracking graduates from high school career readiness programs—such as Jump Start—into aligned higher education programs or employment, presents a particular challenge in building meaningful connections from training programs to high wage, in-demand careers.

Based on this regional context and findings illustrated herein, GNO, Inc. is focusing on the following core activities in the workforce development sphere. Each of the following efforts is designed to augment these gaps through market awareness and clear communication around changing occupations, in-demand skills, and evolving technologies:

**ALIGNMENT BETWEEN HIGHER EDUCATION AND INDUSTRY**

Ensure industry needs are reflected in higher education curriculum and demand-driven, custom-built programming is available at both the university and community college levels.

**GNO, Inc. Signature Initiative: GNOu**

**AWARENESS OF CAREER OPPORTUNITIES IN GREATER NEW ORLEANS**

Produce a suite of research and resources that highlight accurate data around the quality and quantity of regional occupations. Promote these efforts through robust outreach and engagement.

**RETENTION OF GRADUATES IN GREATER NEW ORLEANS**

Connect job seekers to employment opportunities in the region through direct, one-on-one engagement as well as a resources guiding job seekers to regional opportunities.

**GNO, Inc. Signature Initiatives: Employer Connections, DestinationGNO, and WorkNOLA**

**ATTRACTION TO REGIONAL HIGHER EDUCATION INSTITUTIONS**

Position the Greater New Orleans region as a premiere destination for workforce training and education—at both two year schools and four year universities. Undertake a branding and resource development effort to promote the higher education offerings of the region.

**GNO, Inc. Signature Initiative: Development of a website to market the region as an education and research destination**

Though GNO, Inc. is confident that the efforts above will make a positive impact in the workforce landscape, we cannot approach the region’s workforce challenges alone or in a silo. Informed interventions and partnerships across Greater New Orleans and the state of Louisiana are essential.
Business and management occupations represent a diverse array of occupations that span all key industry sectors. The Greater New Orleans region continues to attract white collar jobs that present an opportunity for economic mobility. A former major banking hub, the New Orleans region has the economic infrastructure in place to build on this important sector.
General and Operations Managers

Plan, direct, or coordinate the operations of public or private sector organizations. Duties and responsibilities include formulating policies, managing daily operations, and planning the use of materials and human resources, but are too diverse and general in nature to be classified in any one functional area of management or administration, such as personnel, purchasing, or administrative services.

The Greater New Orleans region is a burgeoning center for innovation and excellence across digital media and technology, from advertising and graphic design to software development. The companies in this sector range from startups, which have increased in quantity over the past decade, to multi-billion dollar corporations that have been recruited into the market.
Web Developers

Design, create, and modify Web sites. Analyze user needs to implement website content, graphics, performance, and capacity. May integrate websites with other computer applications. May convert written, graphic, audio, and video components to compatible Web formats by using software designed to facilitate the creation of Web and multimedia content.

GREATER NEW ORLEANS 2019 JOBS REPORT
The Greater New Orleans region is not only host to a robust pool of health services providers and employers, but also an emerging hub of biosciences research. Home to a booming Bio District in downtown New Orleans, multiple colleges and universities offer training for a range of health-care related programs at facilities across the region. Through the array of programs supporting the healthcare sector, a network of career pathways pipelining candidates from middle-skill to high-skill positions in healthcare exists.

Healthcare Occupations
Radiation Therapists

Provide radiation therapy to patients as prescribed by a radiologist according to established practices and standards. Duties may include reviewing prescription and diagnosis; acting as liaison with physician and supportive care personnel; preparing equipment, such as immobilization, treatment, and protection devices; and maintaining records, reports, and files. May assist in dosimetry procedures and tumor localization.

Occupational Health and Safety Specialists

Review, evaluate, and analyze work environments and design programs and procedures to control, eliminate, and prevent disease or injury caused by chemical, physical, and biological agents or ergonomic factors. May conduct inspections and enforce adherence to laws and regulations governing the health and safety of individuals. May be employed in the public or private sector. Includes environmental protection officers.

The combination of the Greater New Orleans region’s offshore oil and gas industry, and aforementioned healthcare center provide a cluster of opportunities in engineering and life sciences occupations. The energy, petrochemical, and plastics industries employ thousands of skilled workers across the region, and seek similar competencies to certain healthcare occupations as well. The transferability between high-demand, high-wage occupations in these sectors make these career opportunities especially abundant, with refineries and plants in the region spending billions of dollars in planned expansions.
Chemical Technicians

Conduct chemical and physical laboratory tests to assist scientists in making qualitative and quantitative analyses of solids, liquids, and gaseous materials for research and development of new products or processes, quality control, maintenance of environmental standards, and other work involving experimental, theoretical, or practical application of chemistry and related sciences.

Chemical Engineers

Design chemical plant equipment and devise processes for manufacturing chemicals and products, such as gasoline, synthetic rubber, plastics, detergents, cement, paper, and pulp, by applying principles and technology of chemistry, physics, and engineering. Troubleshoot problems with chemical manufacturing processes. Develop safety procedures to be employed by workers operating equipment or working in close proximity to ongoing chemical reactions.

The Greater New Orleans region is one of the only areas in the world equipped to design, manufacture, and assemble advanced space and defense products, including military ground transportation vehicles, civilian and military aircraft, space vehicles, and both naval and commercial ships and boats. In addition to unparalleled infrastructure, lucrative incentives, and a talented workforce, the region provides access to several large defense contractors and NASA’s Michoud Assembly Facility. This, in turn, allows the region to procure key government contracts and leverage regional technology expertise to aid other advanced manufacturing operations—all of which present career pathways for residents.
Heating, Air Conditioning, and Refrigeration Mechanics and Installers

Install or repair heating, central air conditioning, or refrigeration systems, including oil burners, hot-air furnaces, and heating stoves. May test pipe or tubing joints or connections for leaks, or test electrical circuits or components for continuity. May dismantle malfunctioning systems and test components, using electrical, mechanical, and pneumatic testing equipment.

Maintenance Workers (Machinery)

Start machines and observe mechanical operation to determine efficiency and to detect problems. Read work orders and specifications to determine machines and equipment requiring repair or maintenance. Inspect or test damaged machine parts, and mark defective areas or advise supervisors of repair needs. Dismantle machines and remove parts for repair, using hand tools, chain falls, jacks, cranes, or hoists.

Located at the mouth of the Mississippi River, the Greater New Orleans region was founded as the nation’s logistical hub and continues to offer unparalleled infrastructure for international trade. Its location alone — which offers availability of land with deep water access — is cause for trade, logistics, and distribution companies to thrive. Combined with the region’s extensive transportation systems, skilled workforce, and aggressive incentives, the Greater New Orleans region is a global competitor.
Sailors and Marine Oilers

Stand watch to look for obstructions in path of vessel, measure water depth, turn wheel on bridge, or use emergency equipment as directed by captain, mate, or pilot. Perform a variety of maintenance tasks to preserve the painted surface of the ship and to maintain line and ship equipment. Must hold government-issued certification and tankerman certification when working aboard liquid-carrying vessels.

Glossary

JOBS
A job is any full- or part-time position in which a worker provides labor in exchange for financial compensation. Job figures are reported as annual job averages and represent positions as opposed to workers, since a worker may occupy multiple jobs. For the purposes of this report, self-employed workers are not included.

SKILL LEVEL
Skill level is determined by typical entry-level education, on-the-job training, and work experience.

* BASIC-SKILL jobs are those that either require a high school diploma with no formal training or experience, or do not require any formal education.

* MIDDLE-SKILL jobs are those that require some form of education or training beyond high school, but do not require a bachelor’s degree.

* HIGH-SKILL jobs require a bachelor’s degree or above.

EARNINGS
Earnings include base pay, cost of living allowance, guaranteed pay, hazardous-duty pay, commissions and bonuses, on-call pay, and tips. For the purposes of this report, occupational earnings do not include benefits.

TOP PROGRAMS
To determine the top programs by occupation, Emsi connects the jobs to the education programs that typically train for them using a modified version of the National Center for Education Statistics Classification of Instructional Programs (CIP) to SOC Crosswalk.

TOP SKILLS
Top skills are determined by O*NET by surveying a national random sample of job incumbents using standardized questionnaires. For the purposes of this report, the top five skills for each occupation as listed by Emsi were chosen.
Jobs List
