

The Gentilly Agency is a creative services company. We work with artists to help them fill gaps in their organization and maximize their potential through strategy, direction, management, marketing, and production. We operate in front of the camera and behind the curtain of the music industry where the business happens. Our goal is for creatives to become the best versions of themselves and then help them to monetize their creations. Fellows can expect to be exposed to all aspects of the creative process, bringing an idea from conception to market.

Fellow responsibilities:

1. Help create and manage social media content
2. Assist with live event production
3. Assist with recording sessions
4. Participate in artist booking and communications
5. Be available for other company support activities
